WOOD'S CROP SPECIAL

Giving Timely Information and Prices of Seasonable Seeds

PUBLISHED BY T. W. WOOD & SONS SEEDSMEN RICHMOND VA.

VOL. XXVI. OCTOBER EDITION 1931

Will Reduce Your Acreage Production Costs

NOW Is the time to consider quality in seeds. The outstanding reports of record yields obtained from WOOD'S SEEDS are evidence of their **good breeding, freedom** from **disease** and **adaptability** to our own growing conditions.

SOW WOOD'S TRIPLE CLEANED SEED WHEAT this fall. You will be more than convinced what our special process in cleaning wheat means in maximum yields. Prices are low and in line with all commodities produced on the farm. You cannot afford to take chances with inferior seed, when the best only costs a trifle more. At present prices, an increased yield of only 3/4 bushel per acre will more than pay the difference of changing your seed for Wood's Tripled Cleaned adaptable Seed Wheat. What a difference in production costs when five to fifteen bushel increase is obtained.

WOOD'S FORWARD WHEAT — No variety of wheat introduced in the East during the past decade has made so many satisfied growers. They are reporting, that never in their farming experience have they ever obtained such high yields as from Wood's Forward.

Wood's Forward is a beardless wheat, exceptionally smut and rust resistant, very winter hardy and having three to four large, plump grains to the mesh.

WE OFFER only the leading and most dependable strains of **Certified** and **Pedigree** strains, every bushel 100% pure seed wheat, true to name and containing no other crop seeds.

Only New Bags used in shipping Wood's Seeds

TREATING SEED GRAINS—Is an important factor in growing wheat, oats and barley. Under the supervision of the leading State Pathologist, we have installed machinery for the treatment of these grains as a preventive against smut, which is taking such a heavy toll throughout the country.

We are prepared to treat Seed Wheat with 50% Copper Carbonate at an extra charge of 5 cents per bushel, and Oats and Barley at 10 cents per bushel. Regardless of the source of seed, treat your grain before planting. It is cheap insurance.

Pedigree Abruzzi Rye as Grown in North Carolina

IMPROVED STRAINS OF SEED GRAIN FOR FALL PLANTING

Note the long, heavy heads of Wood's Forward Wheat.

Changing your seed for better yielding strains can be accomplished at the lowest cost in years. A good year to put your farm on a higher producing basis. The varieties noted below are highly recommended for fall seeding:

PEDIGREE WINTER GRAY OATS.—This new strain, introduced by us last fall, has proven beyond a doubt the largest yielding Winter Turf Oat on the market. An exceptionally heavy stooler, very winter hardy, disease resistant, and free from cheat, so objectionable in ordinary turf oats generally offered.

CERTIFIED BEARDLESS BARLEY.—Our growers have been most enthusiastic over the out-turn of this crop the past season. Seven of our contract growers report yields of 45 to 65 bushels per acre. Each crop has passed the rigid inspection of the Virginia Crop Improvement Association as being free from disease, mixture or bearded heads. This is one of the most valuable crops for the farm from a grain feeding standpoint.

PEDIGREE ABRUZZI RYE.—Grown from our Improved Certified strain, yielding 30 to 35 bushels per acre. A double purpose crop, furnishing fine grazing during the fall, winter and spring, besides a heavy yielder of grain, seed of which is rapidly increasing in demand throughout the country. Makes a heavy growth while common rye is dormant, and matures two weeks earlier. There is such a vast difference between ordinary rye and genuine Abruzzi that you cannot afford to take a chance. Demand Pedigree or Certified strains.

WOOD'S FORWARD WHEAT.—Still retains its leadership in dependability and record yields—many growers reporting (40 to 50 bushels per acre) the largest yields in all their years of farming. Exceptionally smut and rust resistant; very winter hardy; and has 3 to 4 large plump grains to the mesh. We have never known any grower who was not more than pleased with Wood's Forward Wheat.

PEDIGREE NORTON COLD RESISTANT OATS.—A new cross with winter hardiness of Winter Turf and high yield and earliness of Fulghum. Both smut and rust resistant, producing a stiff straw, with large, heavy heads and grains. It is rapidly coming into prominence, and believe it will eventually replace Fulghum and other southern oats. In a severe season, when other oats winterkilled, Norton yielded 110 bushels per acre.

PEDIGREE NORTON COLD RESISTANT OATS

Heavy Headed, Early Grain Type. Exceptionally Winter Hardy, Resistant to Smut, and High Yielding Strain

Our **Pedigree Norton Oats** are the finest quality, heavy, plump seed that we have handled, and judged by several county agents and leading farmers as being the best crop of Norton Oats that they had ever seen. On one 30-acre field they yielded 78 bushels, averaging 45 to 60 grains per head. It has remarkable stooling qualities, some plants producing as high as 21 good, plump heads from one grain.

Our **Pedigree Norton** is a short stemmed, medium growing oat, which stands up well and resists wind damage, maturing as early as the Fulghum. Has a very broad, fine blade or leaf, and an excellent oat for grazing or for feed. This new oat is fast coming into prominence, and should prove a profitable crop to grow for seed purposes. Sample of these oats will be cheerfully sent upon request for your inspection of the fine quality. Sow at the rate of 2 bushels per acre in drills.

NOTE—We recommend that only the Winter Turf and Norton Oats be used for fall planting. They are more winter hardy and larger yielding than the Fulghum, Rust Poof or Appler varieties.

Wood's Famous Lawn Grass Mixtures for Fall Sowing

Promise A Beautiful Turf Next Summer

Prevailing Prices Lowest in Years

Wood's Dixie Lawn Grass

1 pound sows 250 square feet; 90 to 100 pounds sow an acre.

This mixture is the result of a close and intimate study of grasses suited to lawn making and such as are adapted to Southern soils and climate. In the easterly section of the Carolinas, and throughout the other States of the far South sow **Wood's Dixie Lawn Grass;** in Virginia and further north and in the westerly section of the Carolinas and further west, sow **Wood's Evergreen Lawn Grass. By mail postpaid, 1 lb. 40c.; 5 lbs. $1.65; 10 lbs. $3.05; 25 lbs. $7.00; 50 lbs. $13.90.**

Not postpaid, lb. 30c.; 5 to 24 lbs. 27c. per lb.; 25 to 99 lbs. 25½c. per lb.; 100 lbs. and over 25c. per lb.

Wood's Winter Lawn Grass

1 pound sows 150 square feet; 150 pounds sow an acre.

A special mixture of quick growing grasses that will provide a green lawn during the fall, winter and spring, and later if watered regularly. It may also be sown on Bermuda grass sod to make an all-the-year-round lawn. This mixture is recommended for the lower section of the Southeastern States where other lawn mixtures would not prove a success. **By mail postpaid, lb. 35c.; 5 lbs. $1.30; 10 lbs. $2.35; 25 lbs. $5.30; 50 lbs. $10.40.**

Not postpaid, lb. 25c.; 5 to 24 lbs. 20c. per lb.; 25 to 99 lbs. 18½c. per lb.; 100 lbs. and over 18c. per lb.

Wood's Shady Park Lawn Grass

A special mixture of grasses adapted to growing under trees and in shady places. **By mail postpaid, lb. 47c.; 5 lbs. $2.00; 10 bs. $3.65; 25 lbs. $8.40; 50 lbs. $16.65.**

Not postpaid, lb. 37c.; 5 to 24 lbs. 33c. per lb.; 25 to 99 lbs. 31c. per lb.; 100 lbs. and over 30c. per lb.

Wood's Evergreen Lawn Grass

1 pound sows 250 square feet; 90 to 100 pounds sow an acre.

Our Evergreen is a mixture of grasses that are adapted to lawn making, and contains none of the coarse grasses nor those that grow in tufts or clumps. No one grass makes an ideal lawn grass, so we have put into our Evergreen a well-balanced mixture of grasses that are at their best during different months of the year, will give a beautiful green growth at all seasons, and will make a rich, deep green, velvety lawn in as short a time as possible. For years we have experimented with various grasses and combinations of grasses that are suited to lawn making, and offer a lawn grass mixture that will give a thick and luxuriant turf.

In Virginia and further north, in the westerly section of the Carolinas and further west, sow **Wood's Evergreen Lawn Grass;** in other parts of the South Wood's Dixie Lawn Grass will be found more satisfactory.

By mail postpaid, 1 lb. 45c.; 5 lbs. $1.80; 10 lbs. $3.35; 25 lbs. $7.80; 50 lbs. $15.40.

Not postpaid, 1 lb. 35c.; 5 to 24 lbs. 30c. per lb.; 25 to 99 lbs. 28½c. per lb;. 100 lbs. and over 28c. per lb.

BALANCED MIXTURES FOR PERMANENT CROPS

Our Special Grass and Clover Mixtures provide a much better balanced crop for hay and pasturage than a single crop. Owing to the varying conditions of soils, a combination of grasses and clovers will furnish a more lasting and larger tonnage of nutritious feed.

Put up under tried and tested formulas of grasses and clovers adaptable to various soil conditions.

Wood's Superior Hyacinths

GIANT WHITE NARCISSUS

The Most Satisfactory Winter Blooming House Plant.

They will bloom in water from six to eight weeks from time of planting, if not planted too early, and are superior to any other narcissus for growing in water. Place six or eight bulbs in a shallow bowl with water; support the bulbs with pebbles, and place the bowl in the dark until the roots have started, when they should be brought into the light. Change the water occasionally to keep it pure. From our experiments November, December and January plants give best results.

Each, 10c.; 85c. per dozen; $6.25 per 100, postpaid. Not prepaid, 75c. dozen; $6.00 per 100.

GIANT DARWIN TULIPS

These gorgeous new late or May flowering Tulips are very stately and beautiful, producing immense flowers on tall, sturdy stems, attaining a height of from two to three feet. They embrace almost every conceivable tint in rose, heliotrope, claret, maroon, crimson and other rich and rare shades. Unsurpassed for bedding and cutting.
